The Appendix is required to be cancelled. The Appendix consists of literature references. The references should be cited on an Information Disclosure Statement and the Appendix cancelled because The Printer would not print the information in the Appendix if the case were allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asakawa (U.S. Patent No. 5,117,109) in view of Onishi (U.S. Patent No. 5,449,902). At best, the claims differ from Asakawa (U.S. Patent No. 5,117,109) in reciting use of plural traps. Onishi (U.S. Patent No. 5,449,902) (column 2, lines 48-53 and column 3, lines 47-55) discloses use of multiple traps allows for analyzing multiple successive components of interest and allows for a change over in functions. It would have been obvious to use multiple traps in Asakawa (U.S. Patent No. 5,117,109) because Onishi (U.S. Patent No. 5,449,902) (column 2, lines 48-53 and column 3, lines 47-55) discloses use of multiple traps allows for analyzing multiple successive components of interest and allows for a change over in functions.
